Abstract :

GEOINT2015 , the largest conference dealing with geographical and spatial information for the military security and intelligence activity, was held in Washington D.C., a capital city of United States of AMERICA, during 22 to 25, June 2015. This conference is 11th one and is hosted by the organization named US Geospatial Intelligence Foundation (USGIF). USGIF is consisted of the companies making businesses mainly with National Geospatial-Intelligence Agency (NGA). Various lectures, presentations, and exhibitions have been made in this conference. A director of NGA, Vice Secretary of Defence, and other high ranking officers of US governments and arm forces have given lectures. Many related

companies and organizations have made technical presentations. In the exhibition done in the hall of 100,000 square feet (9000 square meters) , more than 290 companies and companies have exhibited their products. The theme of this conference is "OPENING the APERTURE CHARTING NEW PATHS".

USGIF have announced 11,000 people had registered to this conference. However, US government employee could register with no charge. Take this fact into consideration, it seems that about 5,000 people have attended to this conference. Due to the malfunction in

the system of issuing US visas, few Japanese government officials have attended this conference. However, about 50 Japanese persons, mainly from private companies, have attended.

(The rest is omitted.)
